

About Glam Beauty

Glam Beauty Salon was formed in 2001 and opened up in October of that year. We have always been at the premises that we are in now in The Town Centre Mall in Swords. At that time we just had the downstairs portion of the building and it comprised of a very small reception area and three treatment rooms.

It was a small start but through hard work and very loyal and happy customers the name of our business grew over time. Over time we have introduced some wonderful brands like DECLÉOR, Environ, Advanced Nutrition Programme, Jane Iredale, Lycon and Shellac to name a few.

As our client base grew we also needed to grow and our original salon layout was no longer working for us, so in 2007 a major extension and renovation took place. We acquired the upstairs portion to the building and set about to break through from bottom to top floor and a wonderful design was generated.

This gave us three treatment rooms and a tanning room downstairs and five treatment rooms upstairs with a dedicated nail bar area also. It also allowed us to put in a much more substantial reception area which allowed us to display and stock a lot more of your favourite products.

With this extra room now we can now cater for all treatments we have regular visits from our cosmetic doctor. We have seen a lot of changes in Swords in the last decade and a half and we are now one of the oldest businesses on The Mall at this stage yet we still strive to keep you up to date with all changes in the industry

***Thank you to all our loyal customers again, without you we would not be here.
And remember always shop local please.***

Thank you...Love Always, Mairead & The Glam Girls

ENVIRON®

Environ Skincare achieves outstanding results for people who are serious about skin! Formulated by Dr Des Fernandes, a prominent Cape Town plastic surgeon. Dr Fernandes was the first person in the world to introduce vitamin A into skincare products in high effective doses. This range established Environ as a leader in skincare.

Threading

Eyebrow threading is a depilation technique which originated in India, although it is also widely practiced in the Middle East – now it is the rage in Dublin!

Salons in Western nations offered the service to Middle Eastern clients for decades before European and American women became interested and the popularity of eyebrow threading skyrocketed.

The hair removal technique is not just for the eyebrows: threading can be used to remove other facial and is an alternative to waxing, depilatory creams, tweezing and laser and is suitable for all clients inc. sensitive skin.

East meets West with this excellent treatment – try it today!

Electrolysis

Electrolysis is a destruction of hair by using a special kind of current which cauterises the hair root. The method is to treat unwanted hair by applying a small amount of electrical current to the base of the follicle, by means of your individual probe.

The energy from this hair-fine probe destroys the growth centre of the hair follicle, called the papilla. The probe never actually punctures the skin, rather it is inserted into the natural opening formed by the hair follicle. The hair slides out, and is permanently removed.

Ask our therapists which treatment is best suited to your needs.

Eyelash Extensions

What are eyelash extensions and how are they applied?

A lash extension treatment involves applying individual synthetic lashes onto each natural eyelash to add extra length and volume. They're perfect for holidays, a big event or just perfect lashes every day.

It takes around an hour and a half for a full set to be applied, so it's not a lunch-break treatment. But you'll be surprised; it's relaxing and a lot of people fall asleep whilst they're being applied. Plan your time wisely and catch up on some Zzzs at the same time.

Are there different kinds of lash extensions?

Yes, there are many different variations of lengths, thicknesses and curvatures which you can choose from after an initial consultation with your therapist to get the look you want. You can also get half sets— depending on how full you want your lashes.

How long do lash extensions last for?

Lash extensions typically last the same lifetime as your natural lash cycle, which is between 4-6 weeks. However, to avoid them looking patchy as they grow out, most lash salons usually recommend top ups after 2 or 3 weeks to keep lashes looking completely full and uniform.

Do lash extensions damage your eyelashes?

If you look after your lashes properly and follow the correct aftercare and removal, then your natural eyelashes should be absolutely fine. But, if you're a lash picker and start twiddling with them as they fall out then you can risk losing a few of your own at the same time.

HD Browsculpt

What is brow lamination?

Brow lamination is a two-step eyebrow perming treatment that involves correcting the brow shape by setting the hairs in place using a chemical solution. In the first step, a cream is applied that breaks down bonds in the eyebrow hairs so they can be manipulated into a new position. In the second step, another cream is applied to rebuild these bonds and set the brows in their new uniform position.

If you have unruly, flat or downward growing hairs, eyebrow lamination can change the direction of growth to create a more uniform look with a higher arch and a more desirable brow shape. Brow lamination lasts 4 to 6 weeks generally, with proper care allowing the brow treatment to last as long as 8 weeks.

If this new on-trend & in-demand technique isn't enough, eyebrow lamination forms just part of our full BrowSculpt treatment. Our corrective eyebrow treatment realigns your brow hairs into your desired position, making them much easier to manipulate. It can also help to achieve instantly fuller looking eyebrows using your existing hair. Whether you want to correct your shape, lift the hairs, or both of these options, here are the benefits of our bespoke take on the brow lamination treatment.

How long does brow lamination last?

Brow lamination results last up to 6 weeks following treatment. Your stylist will provide aftercare advice, to help you maintain your fresh brows.

How much does brow lamination cost?

The RRP of HD Brows BrowSculpt treatment is €55. This includes the brow lamination process as part of the full treatment.

How long does a brow lamination take?

The brow lamination process can take up to 12 minutes, however, other tinting and hair removal techniques are incorporated into the treatment. When brow lamination is incorporated into the HD Brows treatment, it should take roughly 55 minutes.

LVL Lashes

How does it work?

By straightening your natural lashes at the root and then tinting them, the LVL Lash Lift gives you the appearance of longer, thicker lashes. No mascara. No messing. Just perfect lashes from the moment you wake up.

How long will it take / last?

Around 45 minutes with an expert LVL lash technician. It's a closed-eye procedure too. Relax. Time for a power nap. You're then set for up to 6-8 weeks.

Will it damage my natural lashes?

We're the undisputed authority in lash care. So you can be assured that our LVL products have been specifically formulated and tested to prevent damage to your lashes.

What aftercare is involved?

LVL is so low maintenance so other than a regular lick of our nourishing Lash & Brow Conditioning Serum, you could say goodbye to mascara for good!
